# RC-8 IR

## 8x15 Universal Room Controller

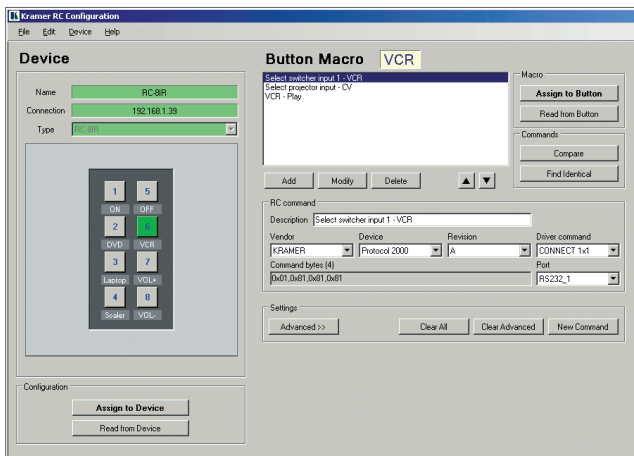

8 Buttons – 15 Commands per Button

### COMPLETE CONTROL FROM KRAMER ELECTRONICS

The first in a family of control products from Kramer Electronics, the RC-8 IR is a flexible, simple and advanced media/room controller for today's modern AV system in training rooms, classrooms, boardrooms and presentation environments. The RC-8 IR is a new breed of media/room controllers combining ease of set up and operation with extensive control capabilities.

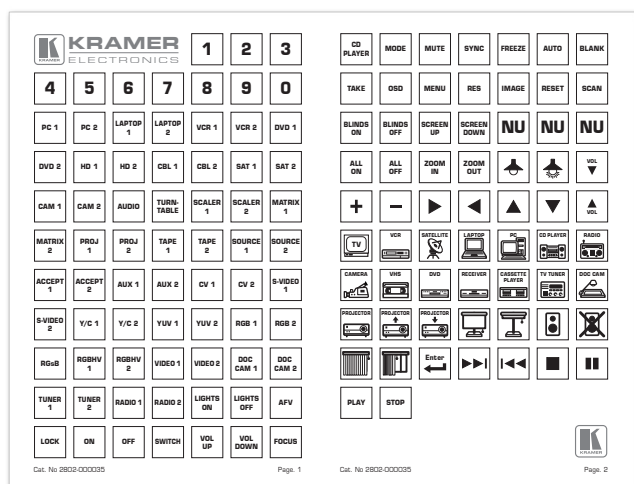

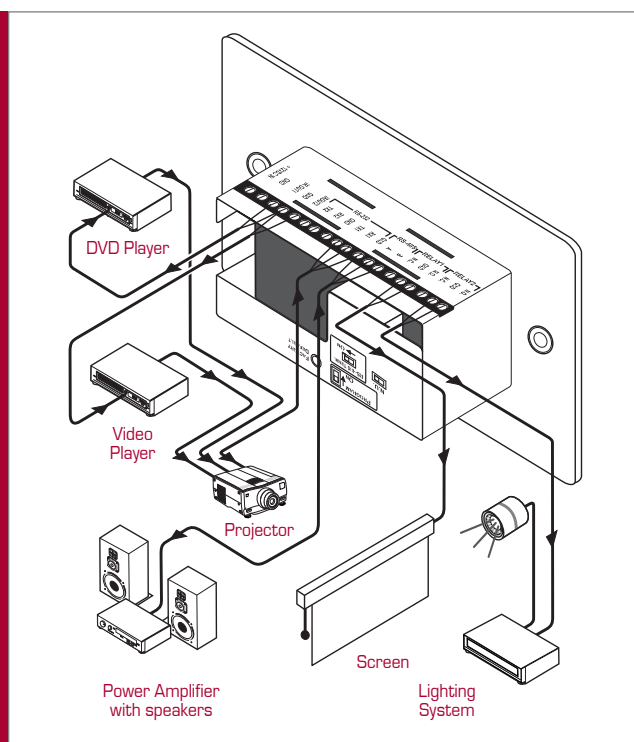

**THE RC-8IR IS SIMPLE** – The RC-8 IR is a one gang wall plate with 8 backlit buttons that can be programmed through the Ethernet port with our incredibly user friendly and intuitive RC Configuration software (included with the RC-8 IR). The buttons can be easily labeled so anyone can interface to the system and control it with ease. The RC-8 IR can also be “locked” to prevent any unintended use.

**The RC-8 IR is Flexible** – The RC-8 IR has 8 buttons that can be programmed with up to 15 commands per button. It also has 8 communication ports over which to transmit commands: 2 IR (each 2x2 for a total of 4 IR emitters with IR learning capability), 1 Ethernet, 2 Relay Contact Closure, 2 RS-232 (bidirectional) and 1 RS-485 (bidirectional). This unit delivers up to 120 total commands.

**The RC-8 IR is Advanced** – The Ethernet port of the RC-8 IR can address up to 5 separate IP addresses. If a system has networked equipment in it, no additional cables need to run to these products. Just plug the RC-8 IR into an Ethernet port and you can program the unit or control the room via a Java based graphical interface from an internet connection anywhere in the world.

- **8 Backlit & Label Capable Buttons with 15 Commands per Button** – up to 120 total commands in a one gang wall plate.
- **Ethernet Port** – Allows for easy set up of the RC-8 IR with Kramer's included user friendly and intuitive RC Configuration software, as well as control of the unit from an internet connection anywhere in the world.
- **5 Addressable IP Addresses from the Ethernet Port** – Control up to 5 networked AV devices from the Ethernet port.
- **Four IR Emitters** – Two IR ports, each of which has two branches.
- **IR Learning Function** – The RC-8 IR can learn commands from any IR remote.
- **2 Relay Contact Closure Ports** – Conveniently control other room items related to the AV system such as raising and lowering drapes, the screen or the projector.
- **2 Bi-directional RS-232 and 1 RS-485 Ports** – Control up to three additional devices via serial control protocols.
- **Lock Out Feature** – The RC-8 IR can be locked and unlocked to prevent any unintended use.

- ◀ Sheets of pre-printed button label inserts are included with every RC-8 IR
