Highly flexible control system for conference- and meeting rooms
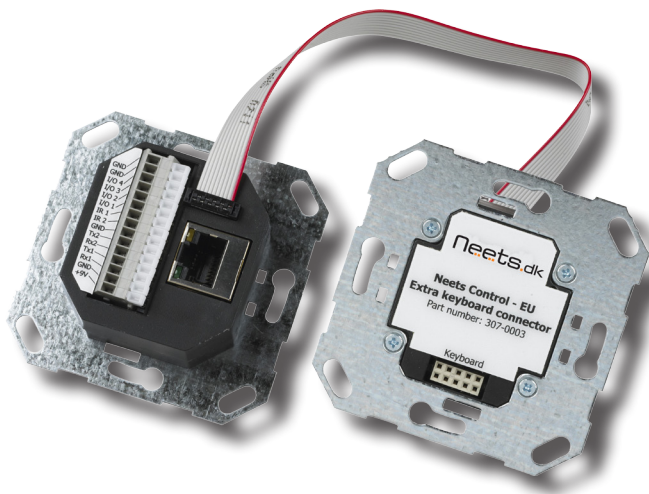

neets
Intuitive Control

A unique solution

You know the situation. You are about to start an important presentation for a large audience, and worry about how to manage the advanced audio visual equipment in the auditorium. Don´t worry! Neets Control - EU Professional is the solution you need.

With just one button press on the control system, the projector will start and show the source you´ve picked, the screen will roll down and the lights will dime. You can start your presentation without any frustration - don´t worry!
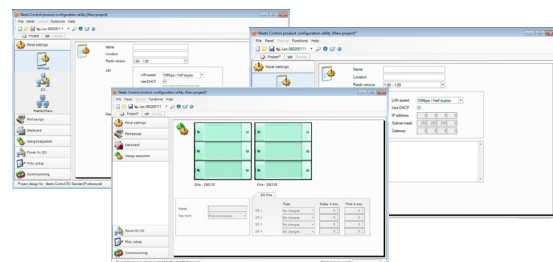

With the Neets Control - EU Professional you get

- High design flexibility
- Same user interface in all rooms
- Custom designed labels
- Compatibility with EU DIN standard
- 1 button press starts it all
- Easy programming
- Easy to operate for the end user, no manual needed
- Sub keys (control device: play, stop, fwd. etc.)
- Central control
- Master / slave function

Special features

Design the Neets Control - Professional in many different ways with a varity of different frames and keyboards.

Programming of Neets Control - EU Professional is easy and intuitive, through Windows based configuration utility software.

Neets Control - EU Professional in short

The Neets Control - EU Professional is the perfect solution for your conference or class room. The system is placed in the panel on the wall next to the other switches of the room and it contains a minimum of buttons - easy and manageable.

Neets Control - EU Professional is an economical control system. Besides accessing all vital functions of large screen projectors the Neets Control - EU Professional controls screen, light, DVD, VCR and any other relay/LAN/RS-232/IR controlled device.

The Neets Control - EU Professional is available with many different keyboards and frames in different shapes and colours. This gives you endless design possibilities

NEETS CONTROL - EU PRO.
P/N#: 307-0002

TUNER

CD

The Neets Control - EU Professional is controlling the screen via RS-232 and the turner and CD player via IR. The Neets 4 relay box is controlled from the systems output, giving power on/off to the screen. The Neets Audio Amplifier is controlled from the RS-232 on the control system. Audio signals from the screen and the CD player is controlled via the Neets Audio Amplifier to the speakers. Over LAN the Neets Control - EU Professional is monitored by Neets Central Control.
