

Take your classroom to the next level

Transform every lesson or brainstorming session into a dynamic learning experience with the TS Series interactive whiteboard. Just the stroke of a stylus or tap of a finger on the touch-sensitive surface enables you to quickly open web pages, highlight lessons, interact with graphic software, save a lesson and more.

Open architecture allows you to add zing to lessons by using the web, your favorite applications and/or software provided with the board. With limitless possibilities, the easy-to-use and time-saving TS Series interactive whiteboard is your solution for bringing learning to life in your classroom—inspiring and engaging students at any level.

Features

- No software to learn—true plug-and-play capability and allows teachers to power up and begin teaching immediately.
- Durable design—withstands the rigors of the classroom.
- Low surface glare—maximizes projection visibility.
- Lightning™—one-touch calibration technology option quickly brings your lesson into focus.
- Open architecture—works with all your favorite software tools such as Microsoft® Office®, the internet and more.
- Integrated controls—allows you to drive at the board and speeds up access to frequently used functions.

“It transformed
my teaching style,
my classroom
and my students.”
