

Interactivity, functionality and aesthetics ... all in one

Combine traditional teaching and modern technology with PolyVision's ēno flex series dynamic board. With the dynamic, board, you can seamlessly integrate a traditional chalk- or marker writing or tack surface with an ēno 2610 or 2810 interactive whiteboard - all without cords or cables. The concealed rail system allows you to slide the board smoothly from left to right,

easily uncovering the ēno interactive whiteboard for immediate access to infinite high-tech teaching and learning possibilities. And, with its aesthetic design, the ēno flex series dynamic board compliments any wall.

Surfaces: C = Chalk / M = Marker / T = Tack

Features

- Choose one or two same-sized boards on either side, plus an additional sliding board
- The ēno interactive whiteboard can be combined with e³ environmental ceramicsteel™ markerboard, chalkboard or tack surface
- Screenprinted pattern options are available for the traditional surfaces
- Maximize space with the easily accessible surfaces layered and anchored by the sliding track
- Integrated pen and cable tray (for projector cabling)
- One fabricator of your choice means one purchase and one installation
- e³ environmental ceramicsteel writing surfaces are Cradle-to-CradleSM Silver certified
- Low total cost of ownership-combines the simplicity of a traditional ceramicsteel surface with interactive performance-all without cords or cables
- Forever Warranty™ - durable ceramicsteel surface lasts as long as your building

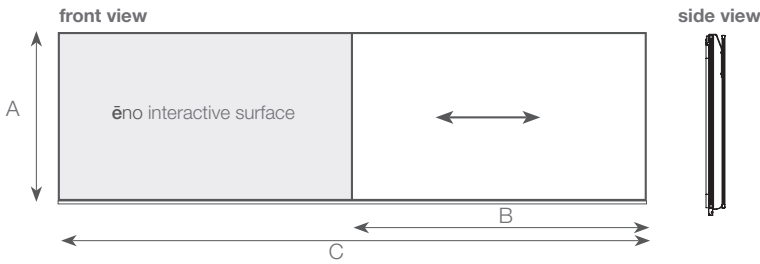

Modern solutions for a high tech environment
