

SMS PROJECTOR SHORT THROW WALL MANUAL

A textbook case when it comes to height adjustment.

Pulling the handle up or down causes the interactive board to move almost by itself, due to the perfectly balanced mechanism. The unique height-adjustment system makes this bracket suitable for conferences and schools, where the children can easily reach right to the top of the board. The height adjustment also means that unnecessary stretching is eliminated. The bracket's low weight, and the fact that much of it has been pre-assembled, mean that one person can complete the assembly in less than one hour. The universal fitting can be used with most currently available boards.

SMS PROJECTOR SHORT THROW WALL MANUAL

INFO

- Colour: Aluminium/White.
- Tilt, projector unislide: $\pm 15^\circ$
- Pillar length: 605 mm (main pillar).
680 / 1200 / 1450 mm (projector pillar).
- Adjustable: The stand can be vertically adjusted manually. The projector can be hung continuously along the entire length of the pillar.
- Length of stroke: 500 mm
- Warranty: 5 years.
- Maximum load, projector pillar: 8 kg
- Maximum load, total: 35 kg
- Maximum board height: 1500 mm
- Maximum board width: Unlimited
- Maximum board depth: 85 mm

N.B.: Maximum load, total, refers to the weight which the stand as a whole can bear, i.e. the combined weight of the projector and interactive board. Using a lighter projector, an equivalent number of kg can be allowed for the board. For example, if the board weighs 31 kg, the projector can weigh 4 kg.

Notes: The stand is easy to move up and down, and as it has no supporting legs to get in the way, users can come up close to the board - making it especially useful for children and physically challenged people. The universal mount that comes with the stand fits the vast majority of interactive boards on the market.
