

SMS PROJECTOR SHORT THROW WALL MOTORIZED XL

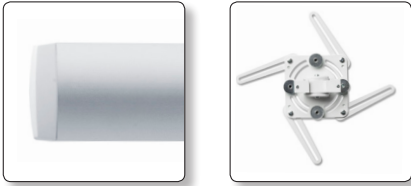

A fixed bracket with electrical lift – for people who want it both ways. The alternative for schools, conference and other applications that need a fixed installation that can be adapted to the heights and needs of the users. One example of this is in schools, when the pupils are to come to the screen and point. An all-inclusive solution with a main pillar that can be electrically raised and lowered. Now with the possibility to choose between white and black universal slides for projectors, and available in a version with two motors, suitable for lifting interactive boards up to 70 kg in weight. Now with one universal fitting for almost all currently available boards.

SMS PROJECTOR SHORT THROW WALL MOTORIZED XL
