

## ALL-IN-ONE PACKAGE

Comes supplied with all screws and bolts required for common projectors, including ceiling fixtures and tools.

## ONSITE CUSTOMISATION

Pipe is cut to exact length on-site for:

1. More accurate installation
2. Faster installation
3. Less administration
4. Faster delivery
5. Fewer errors.

## SATIN WHITE APPEARANCE

Rugged high quality finish blends with ceiling tiles.

## CEILING TRIM DISK

Included is a retrofitable ceiling trim disk to leave tidy finish.

## CATHEDRAL CEILING

Tilting mechanism included for sloped ceilings.

## MINIMAL ASSEMBLY REQUIRED

Techmount arrives 90% pre-assembled which reduces time onsite.

## FALL-ARREST TETHER

For safety we include a safety cable to attach to the projector.

## MANOEUVRABLE

360 rotation and 90 degree tilt at ceiling yoke.

## FITS MOST PROJECTORS

4 fully adjustable spider arms fits 99% of projectors. Spider arms have a maximum span of 340mm.

## CHUTE-THROUGH CABLE MANAGEMENT

No obstructions in pipe after assembly allows retrofitting of cables. Generous exits make pulling cables a breeze.

## DRILLING JIG INCLUDED

Simply cut the pole and use the drilling guide to drill the necessary holes in the pole. No need to drill larger holes which lead to loose assembly.

## FITS OTHERS LEADING BRACKETS

The Techmount will interface with other industry-standard 2" (51mm) brackets, meaning if there is already another bracket in place you want to fix part of the Techmount to, you can.

## STURDY CONSTRUCTION

Over-engineered for stability and safety. 51mm high-strength pole is used for rigidity.

## MOUNTS IN MINUTES

4 ceiling bolts with plastic rawl plugs included.

## LENGTH TO SPARE

Oversized pipe length of 1.1 metres means you'll never be left short.

## ASK DAVE...

If you have any questions just ask Dave. He's an installer just like you and he'll be happy to help. Go to [www.visionaudiovisual.com/askdave](http://www.visionaudiovisual.com/askdave)

## SPECIFICATIONS

### BOX DIMENSIONS

1300 x 160 x 90mm

### PACKAGED WEIGHT

5.5kg

### SAFE WORKING LOAD

20kg [Typical breaking point tested on a calibrated hydraulic test bench: 450kg]
