# Professional LCD Displays with High Brightness and Excellent Picture Quality 

## High Brightness and Excellent Picture Quality

## High-brightness $700-\mathrm{cd} / \mathrm{m}^{2}$ models with wide-viewing-angle IPS panel and LED backlight

The IPS panel provides the wide viewing angle and $700-\mathrm{cd} / \mathrm{m}^{2}$ brightness required for signage and other professional applications. Images are beautifully displayed even in large, brightly lit spaces such as train stations and airports. Information is clearly transmitted with highly detailed Full-HD quality, so the signage content is easy to understand.

## System Expandability

## DIGITAL LINK function enables simple installation and low system costs

Using DIGITAL LINK makes it possible to transmit video, audio and control signals over a long distance (up to 100 $m$ [ 328.1 ft ]) with a single LAN cable ${ }^{\star 1}$. Easy cabling also reduces labor during setup. This provides transmission of high-quality images and sounds, as well as remote control.
*1: CAT5e(STP) cable or higher. *2: WUXGA(1,920 $\times 1,200$ pixels) compatible
