Present | Teach | Inspire

Avtek TouchScreen 65 is a perfect tool that makes the lessons more attractive for students on all learning levels. Thanks to this solution the teaching process can be fascinating by offering e.g.:

- educational games for toddlers – engaging activities for kids combining elements of playing and learning in a very interesting way
- painting – various painting tools and painting book full of pictures ready to be colored
- watching movies – displaying educational materials and movies in high resolution
- performing interactive lessons – diversified with multimedia content and note-making ability

perfect solution for schools and kindergartens

The interactive display can make the visual communication with clients much more interesting. **Avtek TouchScreen 65** can be used in many places such as:

- airport and train stations - passenger information, advertising and tourist guidance
- department stores - easy shop finding with interactive maps etc
- travel agencies – last minute offers and detailed travel or hotel description
- real estate offices - detailed and interactive offer presentation
- public institutions - easy guidance and directions
- fairs – exhibitors announcements and interactive maps

indispensable in visual communication

The conventional business meetings can become much more interesting when using the interactive display **Avtek TouchScreen 65**. Thanks to the interactive functions users can benefit from many additional features such as:

- presentation controlled with touch – navigating through slides becomes as easy as touching the surface of the display
- note-making on the monitor – writing and marking important information directly on the presentation
- cooperation – two people can work together at the same time allowing simultaneous noting and working on any project
- prestige – the display is a professional and modern device which will perfectly fit into the manager's office or the conference room during the business meetings

professional and diversified message

- **Cost saving** – professional, maintenance-free panel for 30.000 hour (20 years life-time, assuming usage for 6 hours a day / 5 days a week) - no lamps or filters to replace.
- **Plug and Play** – just connect the display to power supply and a computer in order to start using the interactive functions. The device will automatically turn on when the signal from the source is detected.
- **Safety** – display with LED backlight will not harm the user's eyes. CE and RoHS certificates together with tempered front antiglare glass (4mm) guarantee safety and long lifespan.
- **Perfect image quality** – Full HD resolution and LED backlight makes the picture clear and visible even in bright rooms.
- **Ecology** – the device automatically goes into stand-by mode (<0.5 W), has low power consumption and doesn't produce toxic waste in a form of mercury projection lamps .

Advantages of Avtek Touchscreen:

Low total cost of ownership

High image quality regardless of ambient light conditions

Easy installation – only the interactive display and a computer are needed to get the complete interactive tool

Disadvantages of traditional IWB:

Projection lamps and filters need to be replaced

Image quality is highly dependent on ambient light

Expensive installation with projector calibration, speaker mounting and additional cables

RM easiteach
NEXT GENERATION

Software delivered with every Avtek interactive display*

RM Easiteach Next Generation is the best interactive software for use in classrooms which is compatible with any interactive whiteboard, projector or other device. RM Easiteach is the most popular software for Interactive whiteboards – only in 2012 over 250.000 licenses were sold worldwide.
