

Neets Central Control

Free Remote Monitoring software

With Neets Central Control software you get an easy way to monitor all your rooms from one central location. It is easy to use, intuitive and help you save a lot of time to administer all your AV-equipment.

If you have a building with Neets Control panels on the network installed in several rooms, you can group and control all the panels with Neets Central Control.

Neets Central Control can also be used to monitor status on lamp and filter hours for your projectors. With Neets Central Control you will always know when it is time to change filter or lamp on your projectors.

Remote monitoring

Monitor rooms with Neets Control – OsCar/ EcHo Plus/ SieRRa II installed from one central location.

Lamp & Filter hours feedback

Get status on lamp and filter hours for your projectors for preventive maintenance

Grouping rooms, floors or levels

Control groups or individual rooms over network – e.g. one “POWER OFF” command for all rooms

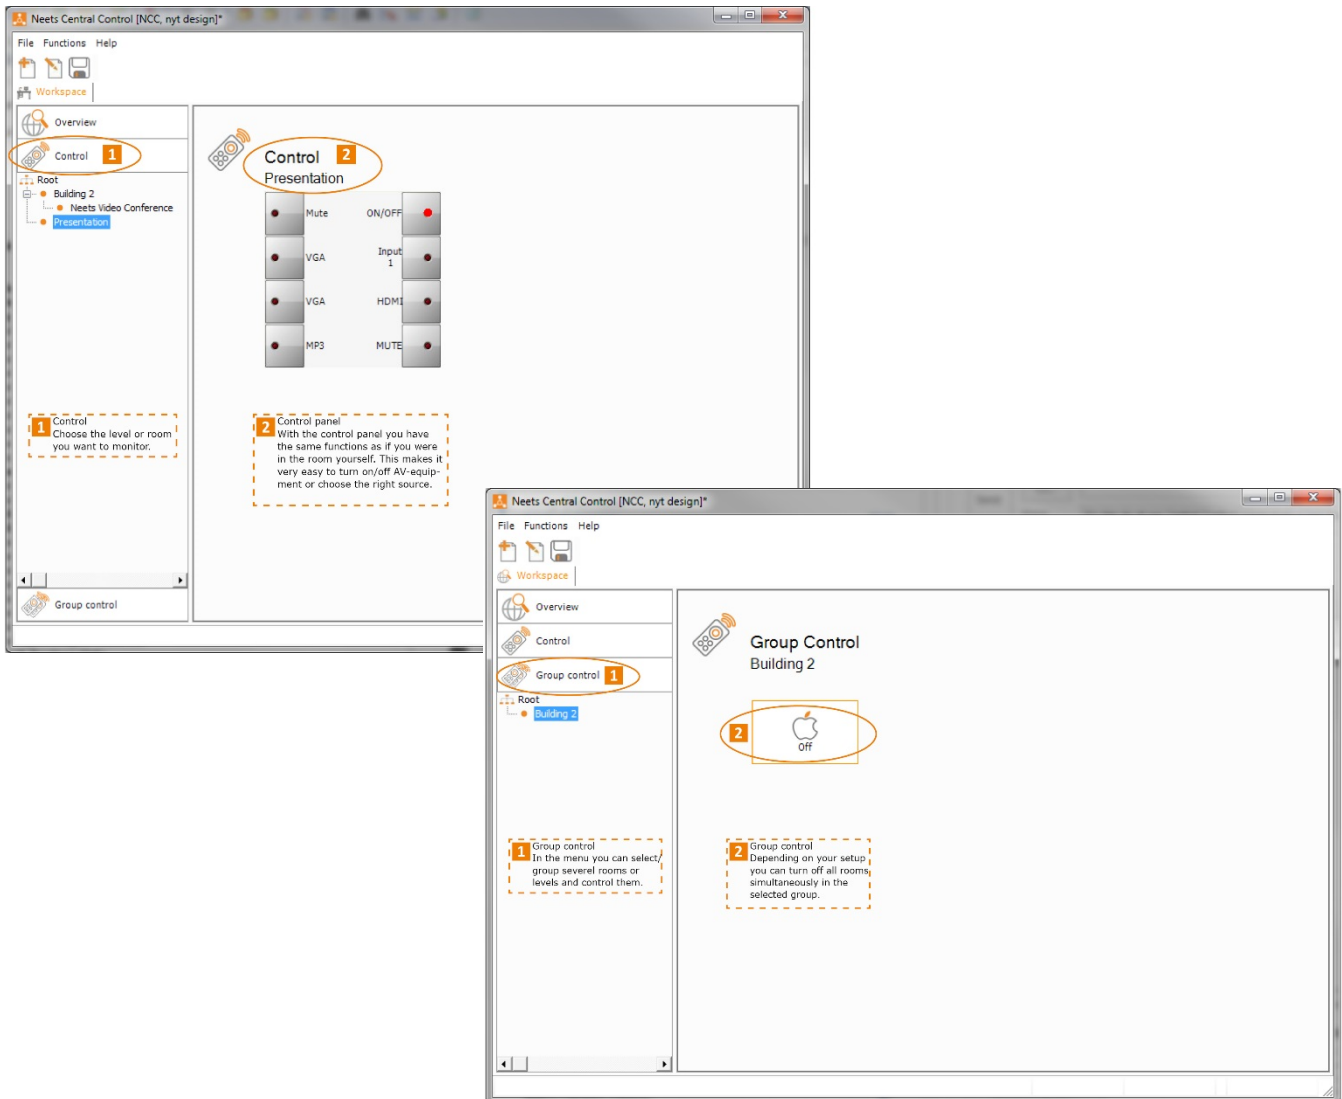

Remote AV support

From AV/ IT support you can immediately get an overview of a room and test the control commands

Software included free-of-charge

Neets Central Control software is a free-of-charge and no-license software
